DOCUMENTS AVAILABLE FOR PUBLIC COMMENT OR APPEAL:

BROWNFIELDS DEVELOPMENT PROGRAM – The Division's Brownfields Development Program encourages the cleanup and redevelopment of vacant, abandoned or underutilized properties which may be contaminated. A party seeking to develop such a property negotiates with the Division's Site Investigation and Restoration Branch (SIRB) for a Brownfields Development Agreement (BDA) or a Brownfields Voluntary Cleanup Program (VCP) Agreement to perform an investigation and, if necessary, a remedial action or remedy, for the purpose of addressing the risks posed by past releases of hazardous substances at these sites. For site-specific information on the following sites, please see SIRB's superfund site files database at: <http://docs.dnrec.delaware.gov/sirbsitefiles.cfm>.

FINAL PLAN OF REMEDIAL ACTION FOR THE CHRYSLER NEWARK ASSEMBLY PLANT SITE (OU-5) (DE-0105)

- The Site Investigation and Restoration Branch (SIRB) has adopted a plan regarding the clean-up of Operable Unit 5 of the Chrysler Newark Assembly Plant Site located in Newark. The Site is owned by 1743 Holdings, LLC, a wholly owned subsidiary of the University of Delaware. From the 1950s until 2008, the Site was the location of a car assembly plant. The Site is being redeveloped as the future location of the University of Delaware's Science and Technology Campus. The Final Plan requires the removal of contaminated soil in the identified "hot spot" areas to prevent human exposure, an environmental covenant be placed on the property deed prohibiting intrusive activity in capped areas without prior written DNREC approval and also restricting property use atop capped areas, and the development and implementation of a DNREC-approved Operations and Maintenance Plan to ensure the continued integrity of the cap. The public may appeal this final plan until January 4, 2011. For additional information, please contact Lindsay Hall, Wendy March or Robert Newsome at (302) 395-2600 or visit:

FINAL PLAN OF REMEDIAL ACTION FOR THE MILLSBORO DUMP SITE (DE-1056)

- The Site Investigation and Restoration Branch (SIRB) has adopted a plan to clean up the Millsboro Dump Site at East State Street in Millsboro. The 3 acre Site is an open grassy field covered with approximately one foot of soil cover. The site soil was contaminated with debris related to the historic landfill operation. An interim action was performed that removed the debris from one side of the landfill. The area was backfilled and a layer of soil and grass seed was placed on top. The Final Plan requires the placement of a Groundwater Management Zone (GMZ), placement of an Environmental Covenant and a Long Term Stewardship Plan with annual inspections of the cap with a goal of maintaining the cap and eliminating the risk to the residual debris located below

the cap. The public may appeal this final plan until January 4, 2011. For additional information, please contact Morgan Price or Robert Newsome at (302)395-2600 or visit:

<http://www.dnrec.delaware.gov/Lists/Public%20Notices/DispForm.aspx?ID=936&Source=http%3A%2F%2Fwww%2Ednrec%2Edelaware%2Egov%2FLists%2FPublic%2520Notices%2FAIItems%2Easpx>

FINAL PLAN OF REMEDIAL ACTION FOR THE DELAWARE AIR NATIONAL GUARD SITE (DE-1003) - The Site Investigation and Restoration Branch (SIRB) has adopted a plan to clean up contamination at the Delaware Air National Guard Site located at New Castle Airport. The 57 acre Site is a military base that is home to the Air National Guard 166th Airlift Group. The site soil and groundwater are contaminated with substances related to long-term maintenance of aircraft at the site. The public may appeal this final plan until January 8, 2011. For additional information, please contact Stephanie Scholl or Robert Newsome at (302) 395-2600 or visit:

FINAL PLAN OF REMEDIAL ACTION FOR THE SEABOARD LUMBER SITE (DE-0251) - The Site Investigation and Restoration Branch (SIRB) has adopted a plan to clean up the Seaboard Lumber Site on Route 18 near Bridgeville. The four acre Site is a former wood treatment facility. Surface and subsurface soil and ground water at the site are contaminated with creosote. The Final Plan requires cleanup of the site with the goal of making it suitable for residential use. The final remedy for the contamination includes in situ surfactant enhanced chemical oxidation, soil mixing and bioremediation. The public may appeal this final plan until January 8, 2011. For additional information, please contact Stephen F. Johnson or Robert Newsome at (302)395-2600 or visit:

PROPOSED PLAN OF REMEDIAL ACTION FOR THE DMA EXPANSION SITE OPERABLE UNIT 1 SITE (DE-1484) - The Site Investigation and Restoration Branch (SIRB) invites public comment on a proposal to clean up the DMA Expansion Site Operable Unit 1 at 0 Middleboro Road in Wilmington. The 3.44 acre Site is currently covered with soil, grass and gravel. The surface and subsurface soil is contaminated with elevated concentrations of benzo(a)pyrene. Benzo(b)fluoranthene is a localized contaminant of concern in the surface soil in the middle portion of the site. Several metals including iron, manganese and aluminum exceeded the unrestricted use scenario. In groundwater, arsenic was detected in one monitoring well at a concentration above the drinking water standards. The comment period ends on January 16, 2011. For additional information, please contact Morgan Price or Robert Newsome at (302) 395-2600 or visit:

Russell and David Banks have proposed to construct two irrigation wells. The wells are proposed to be 12 inches in diameter, one being 100 feet deep, and the second 130 feet deep. They are to be located at 30190 Whites Neck Road, and 35196 Old Mill Road, in Dagsboro. The desired capacities of these wells are 600 and 800 gallons per minute.

The Town of Middletown proposes to install two temporary dewatering systems. One system will be for 50 wellpoints that are 24 feet deep and 1 1/2 inches in diameter. The other system will be for 24 wellpoints that are 20 feet deep and 1 1/2 inches in diameter. The purpose of the project is to facilitate a jack and bore to install utility pipe. The water discharge location will be into the existing ditch. The site is located in the town limits of Middletown between Guido Drive and Horseshoe Drive. The desired capacity of each well point system is 300 gpm, 600 gpm total. A public hearing on the above applications will NOT be held unless the Secretary of DNREC determines that a public hearing is in the public interest or if a written meritorious objection to the application is received by January 16, 2011.
